

To Install Your New Breather Valve:

1. Remove the old breather valve and clean off any remaining adhesive from the valve.
2. Apply a small amount of food-grade silicone adhesive onto the underside of the new breather valve head. Insert into the hole, making sure the valve is fully inserted in the bottle per the Drawing. The top of the valve should be flat against the top of the bottle.
3. Clean up any silicone that comes out the sides of the valve using a wet rag.
4. Allow adhesive to set for at least 24 hours prior to using/washing.
